THE 2026 COLLECTION

Padel has evolved to be faster, smarter, more powerful. Our new collection, is crafted for players who demand the highest level of performance, whether you're chasing total control, explosive power, or uncompromising comfort.

Every racket, ball, and accessory in this lineup is designed with intention, engineered from advanced materials, built with cutting-edge technology, and refined through Scandinavian design principles. Featuring Swedish-made TeXtreme® carbon, premium Japanese fibers, and next-generation spin surfaces, this collection continues to evolve the standard for the modern game.

No matter your level or style of play, we have built the collection to ensure we can offer the perfect racket, ball or accessory for YOUR game.

SEASON HIGHLIGHTS

NEW MOLD

Engineered shape for ultimate performance

FEATURES

- ✓ Oversize teardrop shape with a streamlined profile.
- ✓ Reinforced power heart & power channel.
- ✓ New dual holes design.

BENEFIT

- ✓ Easy handling with high maneuverability.
- ✓ Increased structural stability.
- ✓ Expanded sweetspot for enhanced control.

(featured in Supreme Ctrl Light & Triumph Ctrl Light)

3D ULTRA SPIN SURFACE

Engineered for ultimate effect

The new 3D Ultra Spin surface provides incredible spin to match up with today's modern game. The 1 mm raised multi-directional spin pattern grips the ball regardless of the contact angle.

Player benefits:

- ✔ Effortless spin generation.
- ✔ Increased effect when spin is called upon.
- ✔ Gives the upper hand to put your opponents under pressure.

Swedish carbon innovation

FEATURES

- ✓ Spread Tow structure.
- ✓ Thinner and stronger fibers.
- ✓ Reduced weight due to less crimp and waste material.

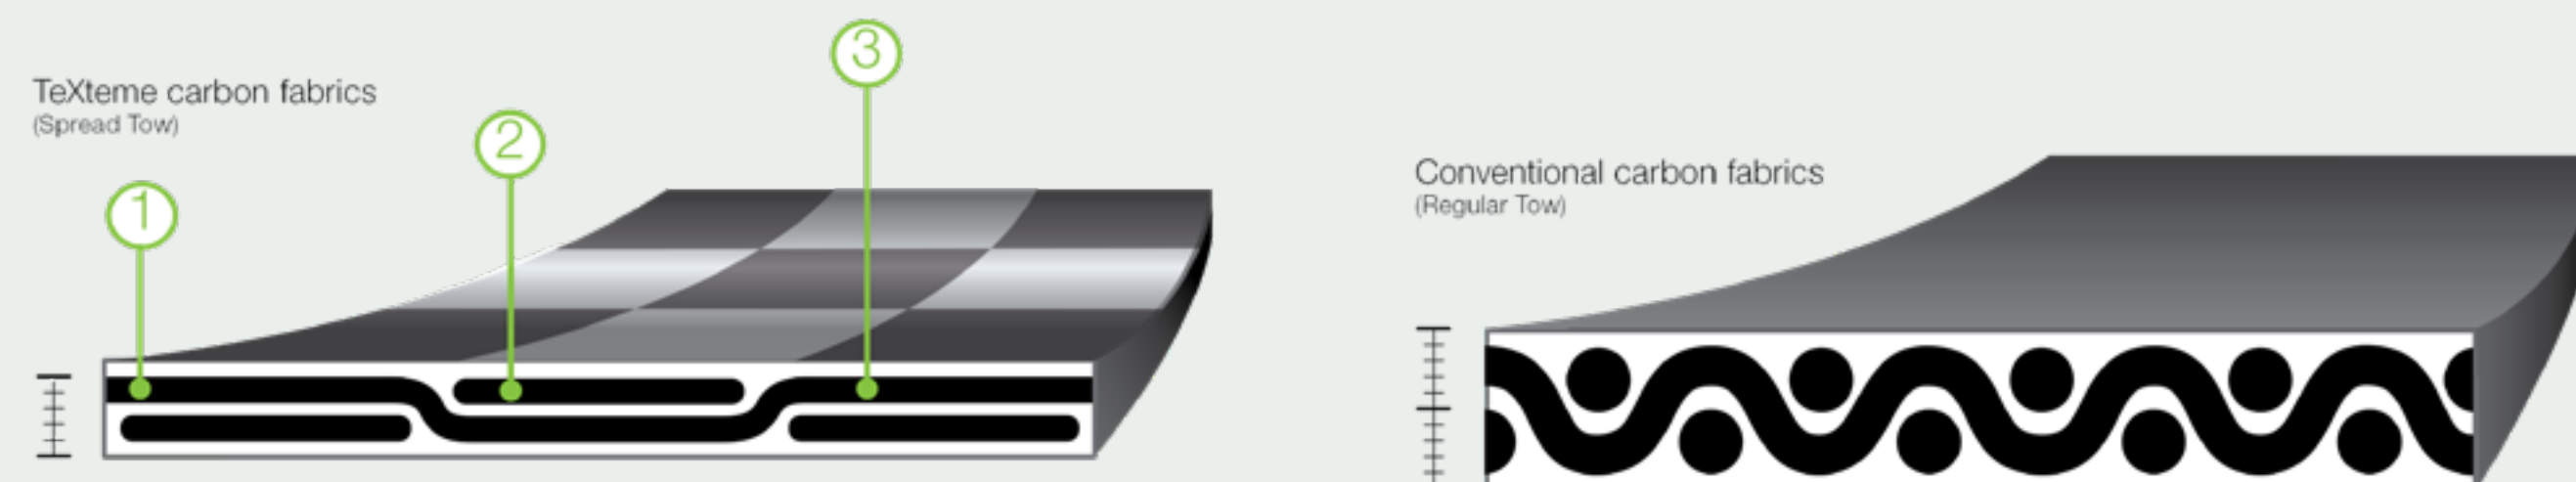

BENEFITS

- ✓ Faster response and more power.
- ✓ Enhanced durability

FEATURED IN

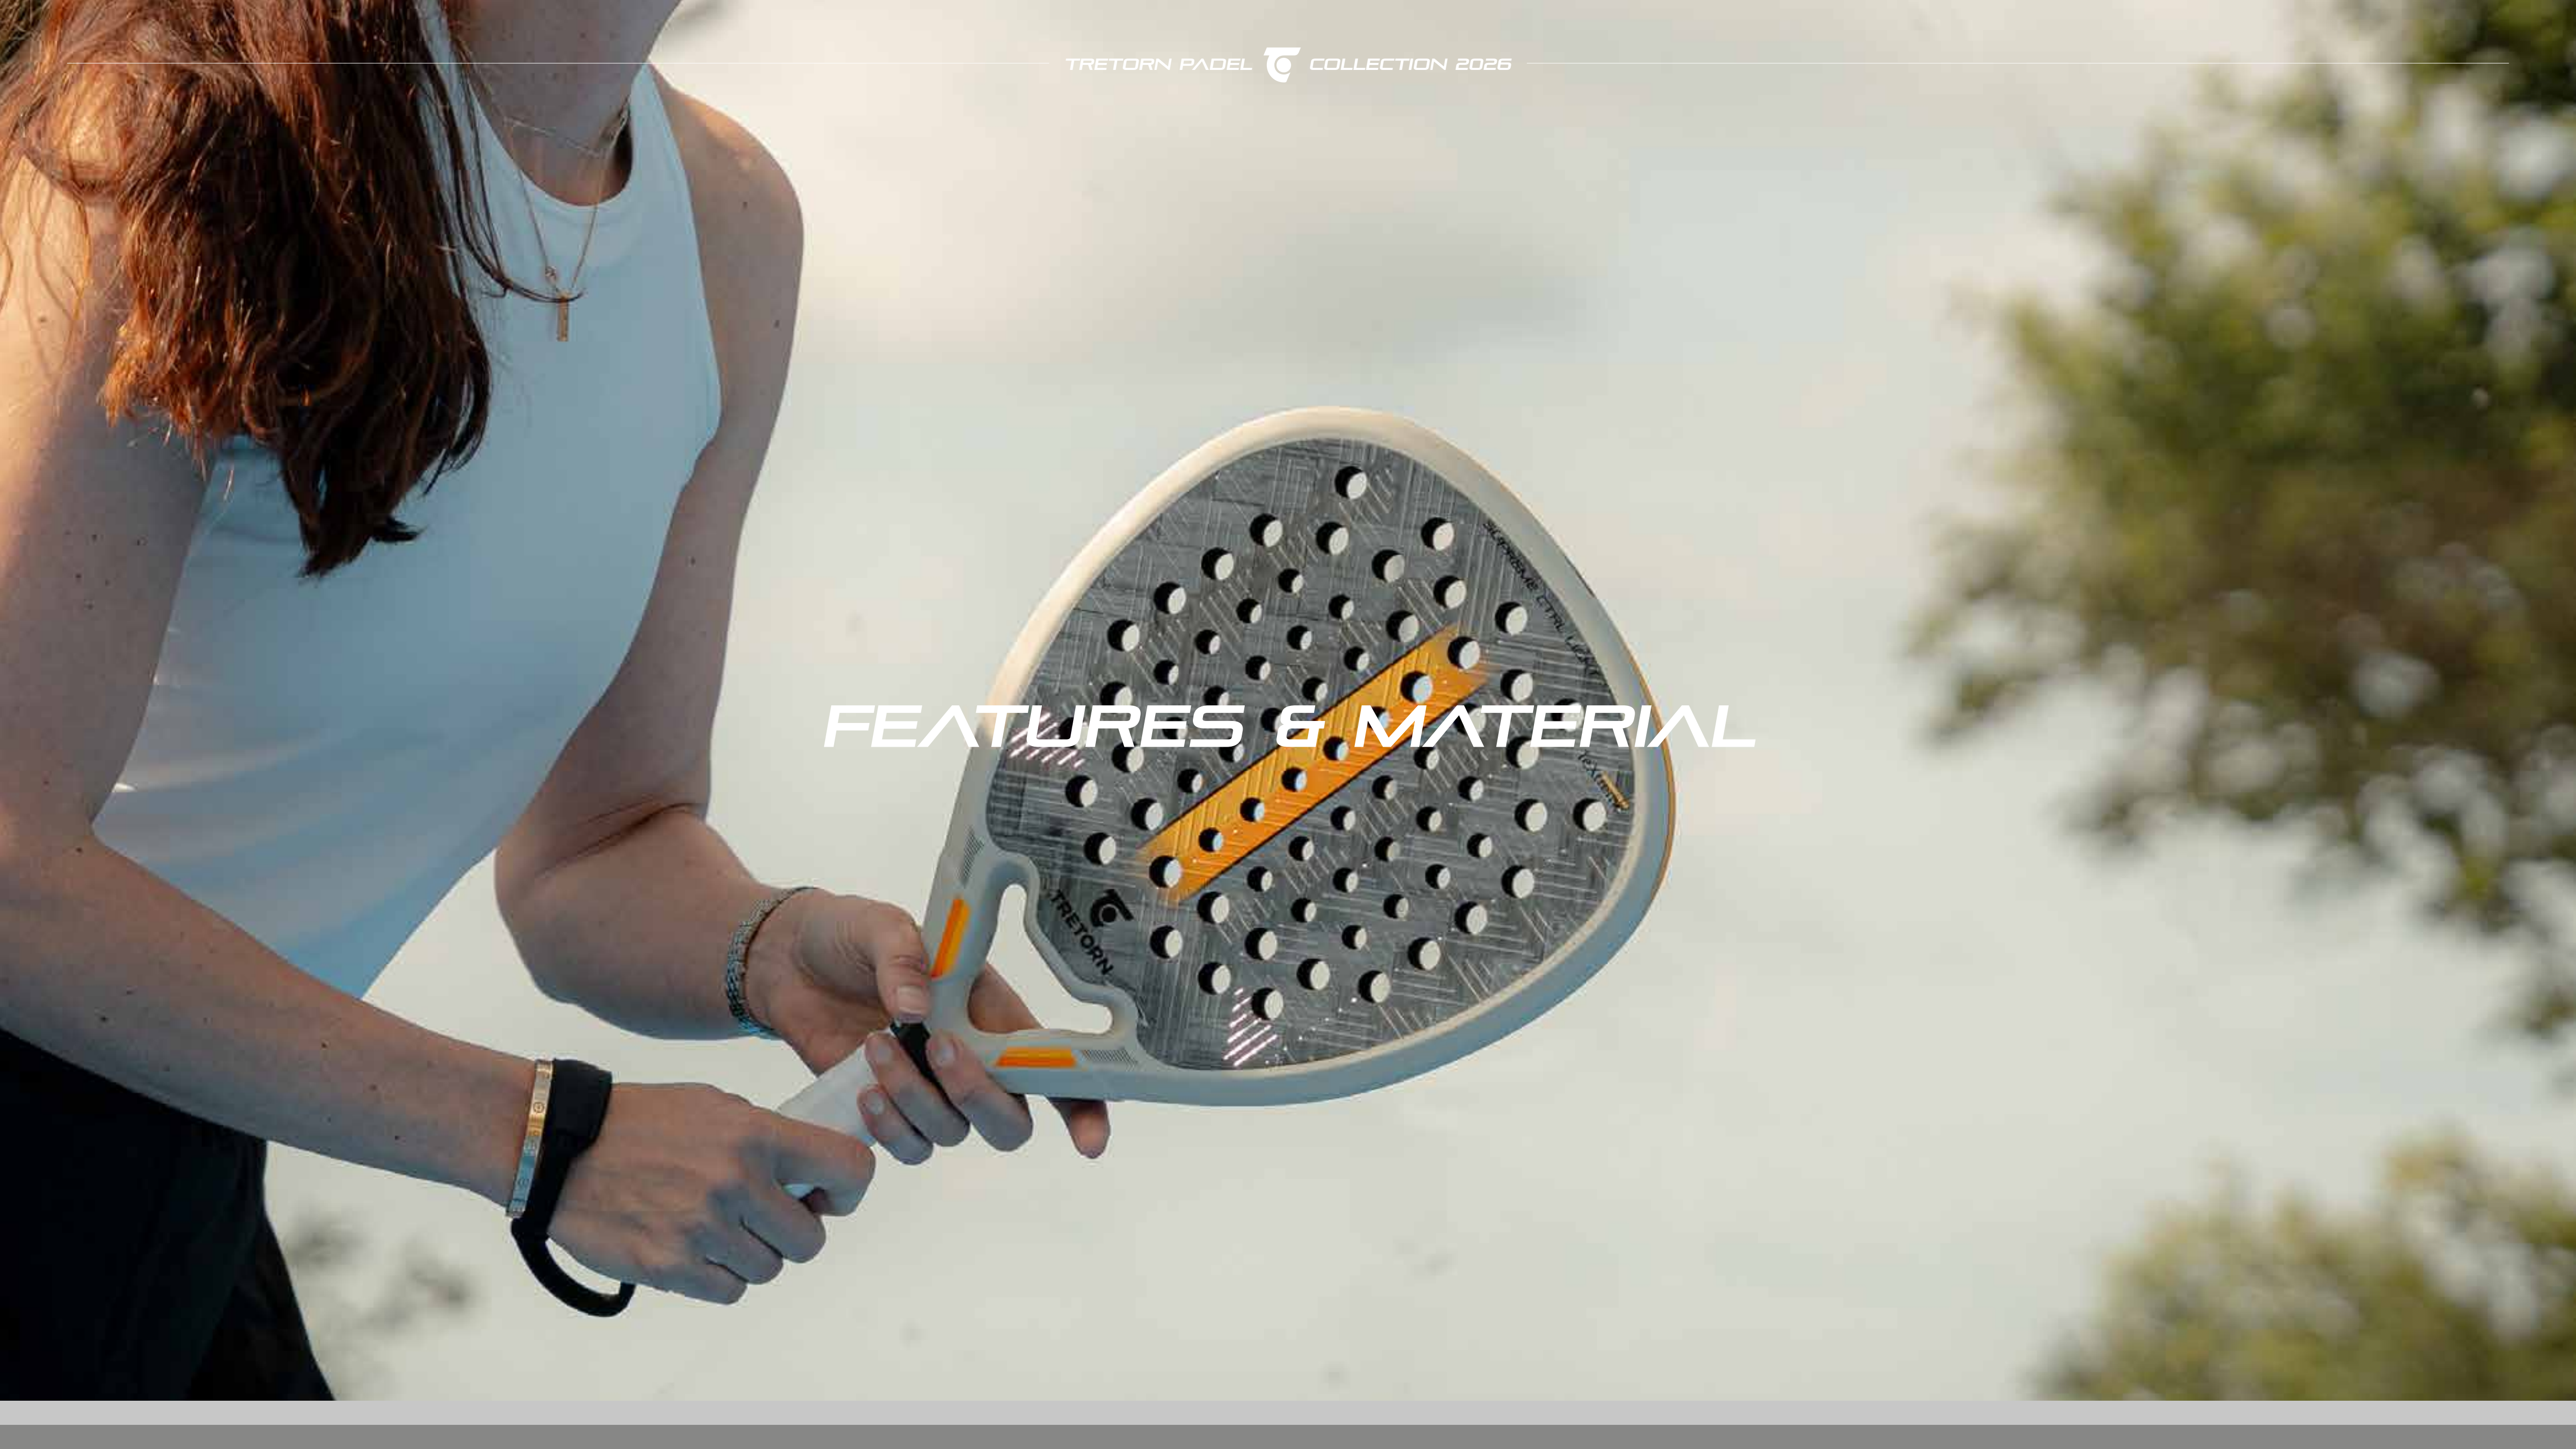

- ✓ Supreme Line

The technology

1. The Spread Tow structure makes it possible to achieve thinner laminates.
2. Straight fibers with reduced crimp optimize and strengthen the composite.
3. Lower crimp reduce the amount of excess plastic thereby minimizing waste.

FEATURES & MATERIAL

FEATURES

AERO
SHAPE

Uniquely designed racket shapes developed for optimal aero-dynamics adding effortless maneuverability and handling.

POWER
HEART

Carbon reinforcements strategically located along side the racket heart to reduce torsion and add stability to the middle and lower parts of the racket.

POWER
CHANNEL

Debossed power channels located along the sides of the frame that increases the overall strength and stability of the carbon frame. This in return add power to your game.

DUAL
HOLES

Specially designed to maximize the sweetspot of the racket surface. The large size holes in the outer areas adds flexibility to the surface and serves to boost the ball output for off-centre shots.

ENGINEERED
HOLE CONF.

Designed to increase the sweetspot of the racket surface. The increased distance between holes in the centre sweetspot provides added strength and durability.

TECHNOLOGY

3D ULTRA
SPIN

New 1 mm raised 3D decal. Designed in a multidirectional pattern to maximize spin of different types of shots executed from various angles on the court.

SPIN
SURFACE

Racket surface treated with Grit or Rubber coating for better ball grip and increased spin.

HIGH-TECH
DRILLING

State of the art drilling process providing and exact hole size accuracy and extra sharp edges adding better grip with every shot.

CENTERED
SWEETSPOT

Marks the area in the racket face that provides maximum return of power from ball impact.

HIGH
SWEETSPOT

Marks the area in the racket face that provides maximum return of power from ball impact.

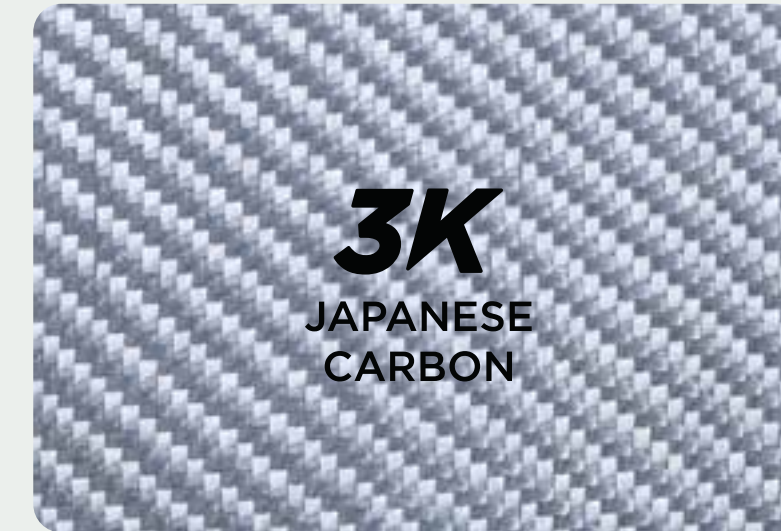

FIBERS

Our advanced TeXtreme® 15K fiber carbon is made in Sweden. Its unique spread tow reinforcement provides a lighter, thinner yet stronger and more durable fiber versus the conventional fiber carbons in the industry.

Our high quality 12K fiber carbon is made in Japan. Its relatively stiff characteristics within the conventional fiber family means fast response and great power when called for.

Our premium twill weave 3K carbon fiber is made in Japan. Its medium flexibility combined with and outstanding durability makes 3K the most widely used fiber carbon structure across industries.

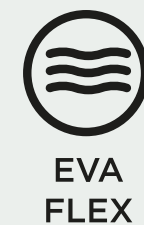

Our premium quality twill weave 3K carbon fiber combined with layers of fiberglass provides added flexibility yet maintaining the strength and durability of this "hybrid" fiber composition.

CORES & FRAME

High density 100% EVA foam with a high level of rebound after ball impact. Our most powerful core providing incredible ball speed when called for.

Medium density 100% EVA foam providing a balanced mix of power and control. The optimal choice when your game calls for both power and control.

Soft and low density 100% EVA foam providing a high level of comfort. The optimal choice for a style of play characterized by control and touch.

All our frames are made with 100% twill weave 3K carbon fiber made in Japan. This adds outstanding structural stability and low torsion without adding unnecessary weight to the rackets.

SUPREME LINE

SUPREME LINE

The Supreme Line is built for high-level players who demand a quick response and high level of spin from their shots.

With advanced TeXtreme® 15K carbon construction and responsive core technology, each racket delivers fast energy transfer, explosive power, and pinpoint precision.

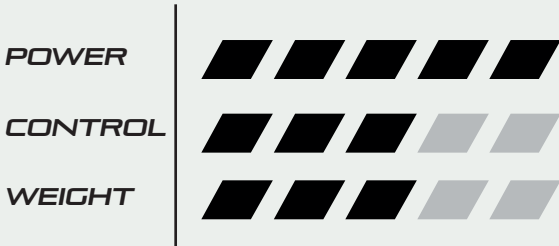

Optimized sweetspot design and 3D Ultra Spin surface give players full control over spin and shot placement — even under pressure. Designed for those who dominate the point and control every rally.

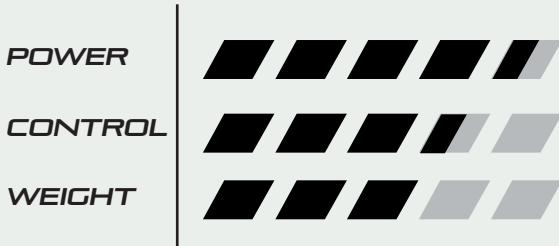

HIGHLIGHTS

- ✓ Quick response
- ✓ Reinforced by TeXtreme 15K
- ✓ Highly durable performance
- ✓ 3D ultra spin surface
- ✓ Japanese 12K

RELIABLE PADEL BALL PERFORMANCE

For over 130 years, Tretorn has pushed the boundaries of ball innovation. The Serie+ Padel collection is built on that legacy by combining advanced TRI-TEC technology with FSC-certified natural rubber to deliver consistent bounce, optimal control, and superior durability. Whether you demand ultimate speed or softer precision, our balls are engineered to perform at the highest level, from pro tour to everyday play.

FEATURES

PRESSURIZED

All our Padel ball models are built with a pressurized construction. The ball’s rebound derives from its internal pressure which quickly pushes back the rubber core to its original shape after ball impact.

TRI-TEC
MEMBRANE

Our unique sealing membrane integrated between the rubber core and the felt. It serves to maintain the balls pressure, bounce, and performace significantly longer versus a standard padel ball construction.

NATURAL
RUBBER CORE

All our ball cores contain a very high percentage of natural rubber for optimal performance. We only use FSC certified rubber that ensures traceability and helps to prevent deforestation.

MEDIUM
SPEED

By combining a highly responsive soft rubber core with a lightweight duraweave construction felt we have developed a medium speed ball with unparalleled control.

HIGH
SPEED

By combining a slightly stiffer yet thinner rubber core with a lightweight duraweave construction felt we have developed a ball characterized by high speed without sacrificing ultimate feel.

TECHNOLOGY

Playne’s

PREMIUM
EUROPEAN FELT

The world’s leading supplier of padel and tennis ball felts in the premium segment. Made in the UK, using the latest production technologies and only working with the best raw materials. Playne’s delivers a consistent quality and high durability.

NATURAL WOOL
DURAWEAVE FELT

A premium duraweave needle punched felt with a market high wool content in this segment of 45%. Due to its construction the felt offers and outstandning durability with a reduced weight optimal for padel.

MOISTURE
REPELLENT

Due to the construction of our duraweave needle punched felt it prevents moisture to get absorbed when playing in humid and wet weather conditions. This also serves to keep the ball’s weight and flight characteristics under control in these conditions.

SERIE+ PADEL TOUR

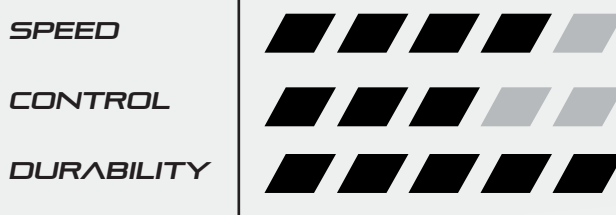

FAST. REACTIVE. DURABLE

DESCRIPTION

Developed for high-level and tournament play, the Serie+ PADEL TOUR is engineered to deliver fast, explosive performance with maximum durability. The premium rubber core offers rapid energy return, while the TRI-TEC membrane helps maintain pressure and bounce over time. Its lightweight, woven Duraweave felt – developed in the UK by Playne’s – provides a consistent flight and long-lasting performance. Designed for speed, stability, and resilience in every rally.

HIGHLIGHTS

- ✓ High speed.
- ✓ Ultimate feel.
- ✓ Keeps the pressure longer.
