Rackets

Timeless heritage. Supreme performance.

Immerse yourself in Tretorn Sport's legacy with our Padel Racket Collection. A seamless blend of heritage and innovation all aimed for a superior on-court performance. All our racket lines have its own unique ID to help deliver YOUR excellence as a player. Join us in the pursuit for perfection supported by our timeless legacy as a brand.

Features & technology

FEATURES

AERO SHAPE

Uniquely designed racket shapes developed for optimal aero-dynamics adding effortless maneuverability and handling.

POWER HEART

Carbon reinforcements strategically located along side the racket heart to reduce torsion and add stability to the middle and lower parts of the racket.

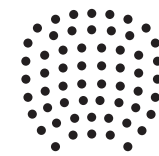

POWER CHANNEL

Debossed power channels located along the sides of the frame that increases the overall strength and stability of the carbon frame. This in return add power to your game.

DUAL HOLES

Specially designed to maximize the sweetspot of the racket surface. The large size holes in the outer areas adds flexibility to the surface and serves to boost the ball output for off-centre shots.

ENGINEERED HOLE CONFIGURATION

Designed to increase the sweetspot of the racket surface. The increased distance between holes in the centre sweetspot provides added strength and durability.

TECHNOLOGY

3D SPIN

Racket surface area treated with grit for enhanced friction to increase the spin of your shots.

3D DECAL

Raised 3D decal designed in a multidirectional pattern to maximize spin of different types of shots executed from various angles on the court.

HIGH TECH DRILLING

State of the art drilling process providing an exact hole size accuracy and extra sharp edges adding better grip with every shot.

CENTERED SWEETSPOT

Marks the area in the racket face that provides maximum return of power from ball impact.

HIGH SWEETSPOT

Marks the area in the racket face that provides maximum return of power from ball impact.

Materials

FIBERS

15K TeXtreme^{REINFORCED BY®} CARBON

Our advanced TeXtreme® 15K fiber carbon is made in Sweden. Its unique spread tow reinforcement provides a lighter, thinner yet stronger and more durable fiber versus the conventional fiber carbons used in the industry.

12K CARBON

Our high quality 12K fiber carbon is made in Japan. Its relatively stiff characteristics within the conventional fiber family means fast response and great power when called for.

3K CARBON

Our premium twill weave 3K carbon fiber is made in Japan. Its medium flexibility combined with an outstanding durability makes 3K the most widely used fiber carbon structure across industries.

3KH HYBRID

Our premium quality twill weave 3K carbon fiber combined with layers of fiberglass provides added flexibility yet maintaining the strength and durability of this “hybrid” fiber composition.

CARBON FRAME

All our frames are made with 100% twill weave 3K carbon fiber made in Japan. This adds outstanding structural stability and low torsion without adding unnecessary weight to the rackets.

CORES

EVA POWER

High density 100% EVA foam with a high level of rebound after ball impact. Our most powerful core providing incredible ball speed when called for.

EVA FLEX

Medium density 100% EVA foam providing a balanced mix of power and control. The optimal choice when your game calls for both power and control.

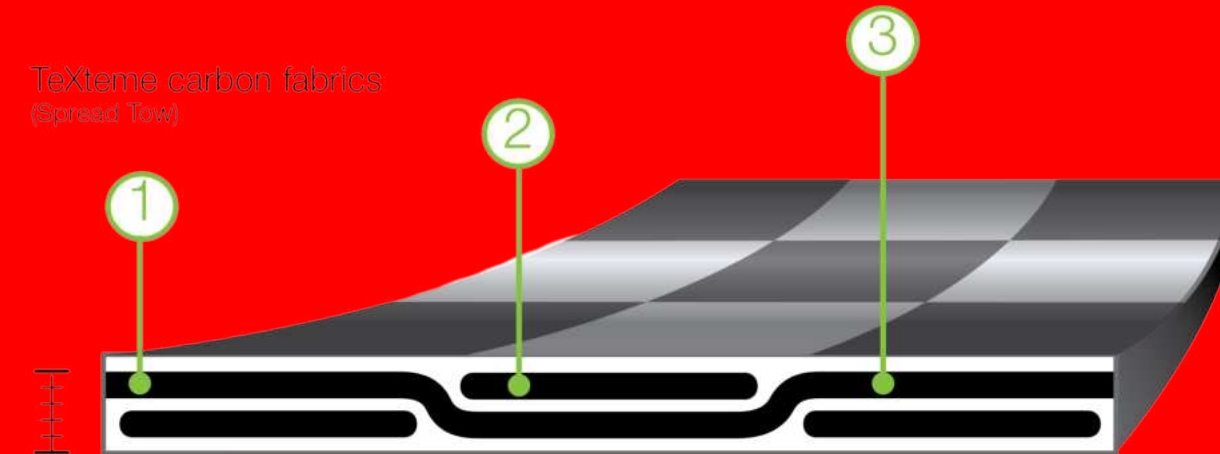

EVA COMFORT

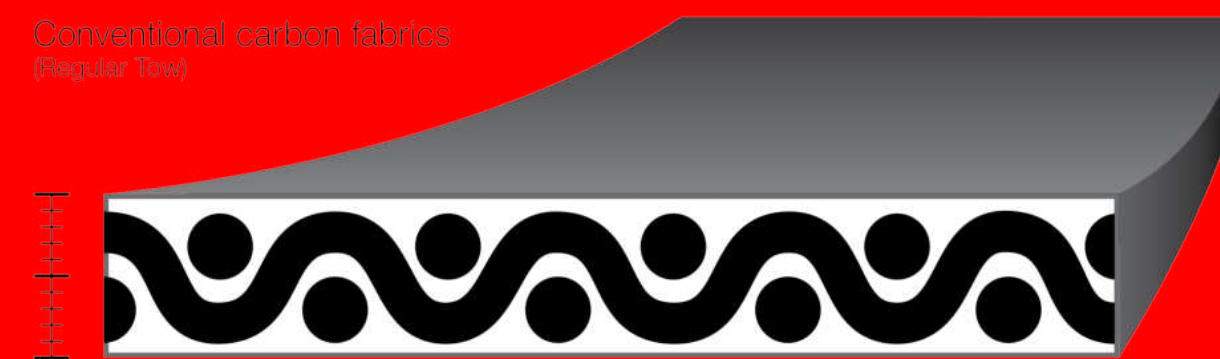

Soft and low density 100% EVA foam providing a high level of comfort. The optimal choice for a style of play characterized by control and touch.

TeXtreme[®] REINFORCED BY

Spreading tows (yarns) into very thin tapes enables reinforcements in woven structure as well as unidirectional tapes with mechanical performance and possibility for weight savings that are unique compared to conventional reinforcements.

1. The Spread Tow structure makes it possible to achieve thinner laminates.
2. Straight fibers with reduced climp optimize and strenghten the composite.
3. Lower crimp reduce the amount of excess plastic thereby minimizing waste.

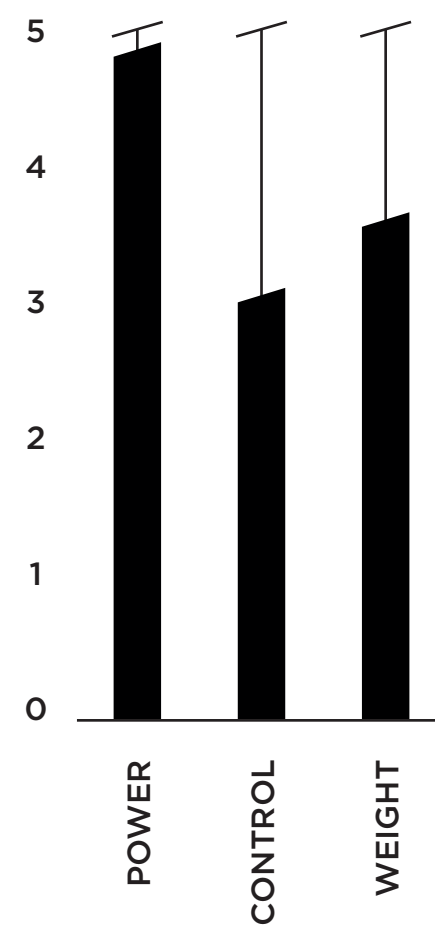

Supreme Line

Elegance meets response.

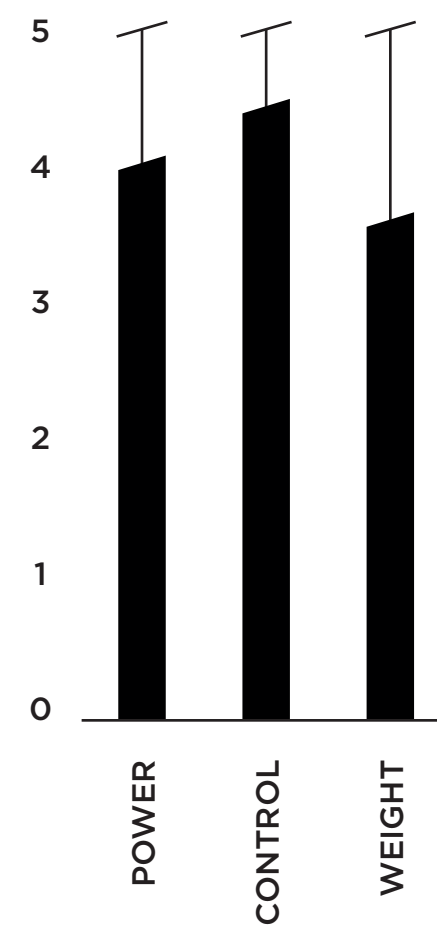

- ✓ Quick response.
- ✓ Reinforced by Textreme.
- ✓ Highly durable performance.

TRIUMPH RALLY

TRIUMPH RALLY CTRL

Supreme Line

SUPREME STRIKE TX

Reinforced by 15K TeXtreme® surface fiber structure that is thinner, stronger and provides a quicker response versus conventional carbon fiber structures. Combined with the EVA POWER core and the high sweetspot makes this a highly responsive power racket optimal for players using their offense to dominate their opponents.

- ✓ *Highly responsive racket with outstanding power.*
- ✓ *DUAL-hole configuration for increased sweetspot.*
- ✓ *Multi-directional 3D decal for added spin.*
- ✓ *Reinforced durability by TeXtreme®.*

Balls

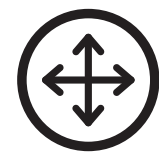

Inhale consistency. Exhale performance.

Discover the legacy of Tretorn Sport with the SERIE+ Padel balls. Crafted for the highest level of play and approved by professionals, the SERIE+ Padel balls embodies Tretorn's commitment to excellence. Precision engineering ensures a consistent bounce, delivering optimal performance on the court. Step into a world where every detail reflects our dedication to quality. Embrace our legacy and elevate your game. It is here, where consistency meets performance.

Features & technology

FEATURES

PRESSURIZED

All our Padel ball models are built with a pressurized construction. The ball's rebound derives from its internal pressure which quickly pushes back the rubber core to its original shape after ball impact.

TRI-TEC MEMBRANE

Our unique sealing membrane integrated between the rubber core and the felt. It serves to maintain the balls pressure, bounce, and performace significantly longer versus a standard padel ball construction.

NATURAL RUBBER CORE

All our ball cores contain a very high percentage of natural rubber for optimal performance. We only use FSC certified rubber that ensures traceability and helps to prevent deforestation.

HIGH SPEED

By combining a slightly stiffer yet thinner rubber core with a lightweight duraweave construction felt we have developed a ball characterized by high speed without sacrificing ultimate feel.

MEDIUM SPEED

By combining a highly responsive soft rubber core with a lightweight duraweave construction felt we have developed a medium speed ball with unparalleled control.

TECHNOLOGY

Playne's

PREMIUM EUROPEAN FELT

The world's leading supplier of padel and tennis ball felts in the premium segment. Made in the UK, using the latest production technologies and only working with the best raw materials. Playne's delivers a consistent quality and high durability.

NATURAL DURAWEAVE FELT

A premium duraweave needle punched felt with a market high wool content in this segment of 45%. Due to its construction the felt offers an outstandning durability with a reduced weight optimal for padel.

MOISTURE REPELLENT

Due to the construction of our duraweave needle punched felt it prevents moisture to get absorbed when playing in humid and wet weather conditions. This also serves to keep the ball's weight and flight characteristics under control in these conditions.

SERIE + PADEL TOUR

High speed tour performance padel ball powered by TRI-TEC Technology providing unparalleled consistent performance. The extra thin rubber core and the lightweight duraweave felt provides ultimate feel.

- ✓ *High speed.*
- ✓ *Ultimate feel.*
- ✓ *Keeps the pressure longer.*
